

Marine Grade DEF (40% Concentration)

Since the new regulation will enforce the entire maritime industry to be enhanced with SCR system engines', Azure DEF is pleased to announce our new product line for aqueous urea solution at 40% concentration. This solution is required to operate all SCR converters to reduce Nitrogen Oxide (NOx Reduction) emissions of internal combustion engines and boilers. This international standard is covering quality requirements and guidelines of AUS 40 for Marine application as per ISO 18611.
